# VILROS

RASPBERRY PI CLEAR CASE INSTRUCTIONS

> **!** Important: Remove SD card from the Raspberry Pi Before Inserting and removing into case

The Case includes 2 parts:

1. Bottom

2. Top

The case also includes small screws, these screws are used to connect a camera module to the top part of the case if you are using a camera module with the Raspberry Pi.
THE SCREWS ARE NOT USED TO SECURE THE BOARD TO THE CASE.

Step 1: Align the ports and Insert the Raspberry Pi into the bottom part of the case.

Once inserted, press down on the board until it snaps into place.

Step 2: Align the top part of the case with the ports and press the top and bottom of the case together to snap them into place.

Snap the bottom and top together.
